

A close-up photograph of several vibrant pink flowers and buds. The flowers are in various stages of bloom, with some fully open and others as tight buds. The petals are a rich, saturated pink color. The background is dark and out of focus, making the flowers stand out prominently. The text 'Varieties kpholland breeding' is overlaid on the right side of the image in white.

“BORN TO BREED AND BLOOM”

EN | Aware of its role as a progressive grower, KP Holland produces products of constantly good quality. The unique combination of both disciplines breeding and growing - in a single company distinguishes KP Holland. It is a company that knows not only about its product but also about its market. The varieties developed by the companies breeding activities are tested for their commercial potential. Commercial potential is included as an objective in the continued development of new varieties. KP Holland is born to breed & bloom.

NL | Als vooruitstrevende kweker produceert KP Holland producten van goede en constante kwaliteit. De unieke combinatie van de disciplines Breeding & Growing binnen één onderneming maakt KP Holland een bijzondere speler in de markt. Productkennis en marktkennis bevinden zich onder hetzelfde dak. De rassen die binnen Breeding worden ontwikkeld, zijn getoetst aan de marktkansen. Marktkansen worden door vertaald bij de ontwikkeling van nieuwe rassen. KP Holland is born to breed & bloom.

GROWING

More info: verkoop@kpholland.nl

EN | What sets KP Holland apart as a producer of flowering plants is our provision of high-quality products and excellent service. Our technically advanced cultivation system allows us to supply uniform batches that are completely in line with preferences of our customers. Whether orders are large or small, include labels or sleeves, need to have plants in ceramic pots, etc. - we can handle it. Our flexibility makes even last-minute changes possible.

We strive for an open business relationship with our trading partners. This keeps us informed of market developments related to retail, home and health trends. This information is then applied to the development of registered trademarks or sales concepts.

NL | Het leveren van kwalitatief hoogstaande producten en service is wat KP Holland onderscheidt als bloeiende planten producent. Dankzij het geavanceerde teeltsysteem leveren wij uniforme partijen, geheel naar de wens van de klant. Grote of kleine bestellingen, met sticker, hoes of in een keramieken pot, alles is mogelijk! De flexibiliteit is groot, er kan snel geschakeld worden. Omdat wij graag met onze (handels)partners samenwerken, weten wij wat er speelt in de markt, op het gebied van retail, wonen en gezondheid. Die kennis wordt ingezet bij de ontwikkeling van nieuwe merken of verkoopconcepten.

BREEDING

More info: breeding@kpholland.nl

EN | Distinctive properties exhibited by KP Holland's product groups Breeding efforts are always devoted to developing varieties with attractive compact habits and improved keeping quality. This will allow consumers to enjoy their purchase longer and better.

The need to expand the assortment of Spathiphyllum, Kalanchoe and Curcuma varieties led KP Holland to start breeding them decades ago. To produce varieties displaying better keeping quality, longer-lasting flowers and new colours, the breeders and lab technicians at KP Holland are constantly working on selecting the best combinations.

NL | Onderscheidende eigenschappen binnen de productgroepen van KP Holland zijn onze prioriteit. Bij alle gewassen wordt ingezet op aantrekkelijke compacte plantvormen en betere houdbaarheid waardoor de consument er langer plezier van heeft.

Vanuit de behoefte om het assortiment voortdurend te verbreden en uit te breiden met betere rassen, zet KP Holland al tientallen jaren in op veredeling binnen de gewassen Spathiphyllum, Kalanchoë en Curcuma. Betere houdbaarheid, sterkere bloemen, nieuwe kleuren... de veredelaars en laboranten van KP Holland zijn continu bezig met het vinden van de beste combinaties.
